

Platforms Comparision

1. Azure Document Intelligence:

- Strong text & handwritten extraction
- Best for tables & key-value pairs
- Best layout Understanding
- Custom models
- Cost:

2. Google Cloud Vision API:

- Excellent text recognition
- Tables & key-value pairs requires more manual coding
- Good for positions and paragraph
- No custom model
- Best for identifying what is in the image

3. AWS Textract:

- Excellent text extraction
- Best table extraction
- Build for financial/legal tables
- Strong handwritten

4. OpenAI Vision (GPT-4o):

- Good for text & handwritten
- Not mentioned for tables & fields
- Not mentioned for key-value pairs
- Strong image extraction
- Custom training for layout

Pricing Summary (Typical Use Cases)

Simple OCR only (text extraction):

- **Google Vision OCR** — cheapest and simple (~\$1.50/1,000).
- **AWS Textract Detect Text** — similar cost (~\$1.50/1,000).
- **Azure Document Intelligence** — competitive comparable rates (often ~\$1/1,000+; depends on region & tier).
- **OpenAI Vision (GPT-4o)** — Not official but (\$8 /1,000)

Structured extraction (tables + fields):

- **AWS Textract** — powerful but *much more expensive* (tables ~\$15–\$70/1,000).
- **Azure Document Intelligence** — Query Fields (\$10-\$15 /1,000) (often more predictable).
- **Google Vision** — *not supported natively* — you would need Google Document AI (separate pricing).
- **OpenAI Vision (GPT-4o)** — Not official but (\$8.7+ /1,000)
